
Secondary Science

Week Three

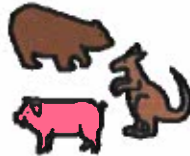

April 6th to April 10th

Living and Non-Living

Some things are living. This means they are alive. They grow and change all by themselves. They need food and water to live.

People are living. Animals are living. Plants are living.

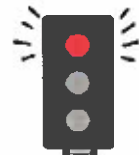

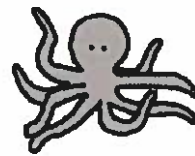

Some things are not living. This means they are not alive. They do not move by themselves. They do not change or grow. They do not need food or water.

Basketballs are non-living. Cookies are non-living. Tables are non-living.

Circle the living things. Put an X on the non-living things.

**Circle the living things. Put an X
on the non-living things.**
